SUMMARY

Backend developer skilled in Python and FastAPI, with hands-on experience building and deploying REST APIs featuring authentication, relational databases, and containerization. Able to take a project end to end — from writing the API to shipping a live, cloud-deployed application. Seeking a junior Backend / Python Developer role.

TECHNICAL SKILLS

Languages	Python, SQL
Backend	FastAPI, REST APIs, JWT Authentication, SQLAlchemy, Pydantic
Database	PostgreSQL
Tools & DevOps	Docker, Git, GitHub, AWS (EC2, IAM), Render (cloud deployment)

PROJECTS

Task Manager API — Python, FastAPI, PostgreSQL, Docker

[Live Demo](#) | [GitHub](#)

- Built a REST API with JWT authentication, bcrypt-hashed passwords, and protected routes for secure user sessions.
- Designed a relational schema linking tasks to users with SQLAlchemy foreign keys; validated all input with Pydantic.
- Containerized the app with Docker and deployed it live to the cloud with a managed PostgreSQL database on Render.
- Also deployed on AWS EC2 (Ubuntu) with security group configuration and SSH setup, gaining hands-on cloud experience.

Employees REST API — Python, FastAPI, PostgreSQL

[GitHub](#)

- Developed a full CRUD API for employee records with clean, well-structured endpoints.
- Added query features including filtering by department, sorting by salary, and record counts using SQLAlchemy queries.

CERTIFICATIONS

- Programming for Everybody (Getting Started with Python) — Coursera
- Generative AI — IBM (Coursera)
